ABOUT ME

7+ years of experience in Systems Development, specializing in backend technologies and database management. I work with **Laravel PHP** to build scalable web applications and have a solid foundation in **native PHP development**. My database expertise includes designing efficient schemas and writing optimized queries in **MySQL**. On the frontend, I have **strong proficiency in JQuery, VueJS, JavaScript, HTML5, CSS3, Bootstrap 5 or Tailwind CSS**, allowing me to build responsive and user-friendly interfaces. I focus on delivering seamless user experiences by implementing modern frontend frameworks and best practices in UI/UX design. As a **team leader**, I've successfully managed developers and facilitated smooth collaboration. I'm passionate about delivering high-quality web solutions and staying current with the latest technologies.
